PROFILE

I am a front-end developer from Madagascar with 4 years of experience contributing remotely to building web and mobile applications for companies based in United Kingdom and Europe. Accomplished web developer with extensive experience creating responsive and user-friendly web and mobile applications

WORK EXPERIENCE

90 Percent of everything - Frontend developer 2022 August - Present
React, TypeScript, GraphQL, Apollo Client, Ant Design, Jest, React testing library

- Building a responsive card component with React, GraphQL, Apollo client and Ant Design.
- Developed client web projects using tools like React, Typescript, Apollo Client, GraphQL, and Ant Design.
- Improving codebase health by analyzing the source code, implementing integration tests, and seeking opportunities to improve the efficiency of the tech stack with React, Apollo Client, Jest, and Typescript.
- Collaborated with team members to achieve target results.
- Coordinating with design leads, architects, product owners, and other key stakeholders.
- Working closely with the creative team to plan, build, and deploy web pages across the company website.
- Implementing multiple features on the existing platform as requested by the customers.

Lighthouse - Frontend developer 2021 July - 2022 July
WordPress, PHP, React, JavaScript, Tailwind CSS, SaSS, Airtable

- Interfacing with clients to identify business requirements, and decide the project's technical specifications.
- Engaging in emerging technology research and development through proactive research, and training.
- Delivered and maintained user-friendly website interfaces with accessible components to work seamlessly across all browsers and devices with WordPress, PHP, JavaScript, HTML, Tailwind CSS, SASS, and Styled component with CSS
- Developed droppable and draggable components with React
- Optimized pages for web performance, load times, and SEO.
- Build Airtable automations using Airtable script.
